# **Assignment: Edge Case Testing on Everyday Objects**

### **Objective:**

Sharpen your QA mindset by identifying unusual, unexpected, or extreme scenarios — not regular functionality.

#### What to Do:

Write Minimum **5 edge-case test scenarios with a short description** - for each of the following:

- ATM Machine
- Hand Sanitizer Bottle
- Elevator / Lift
- TV Remote Control
- Basic Phone Dialer (smartphone)
- Ceiling Fan Regulator

### **Guidelines:**

- Focus strictly on **edge cases** odd inputs, rare misuse, strange environments.
- Briefly explain each case and why it qualifies as an edge scenario.
- Submit a Doc or, preferably, a PDF through the Google Form.
- **Do not take help** from others or the internet this is a test of your own creativity and thinking.

## Examples (not part of assignment):

- Typing emoji's into a password field
- Copy-pasting a 10,000-character string into the login field
- Submitting the login form with JavaScript disabled
